SUMMARY

Recent Master of Computer Applications (MCA) graduate with a deep passion for Artificial Intelligence and Machine Learning. Possesses hands-on project experience in computer vision, natural language processing, and building predictive recommendation engines. Highly motivated to continuously learn, adapt to emerging AI technologies, and apply advanced machine learning algorithms to solve complex, real-world problems.

PROJECTS

AI-Powered Virtual Canvas

Stearmlit, OpenCV, Google MediaPipe, Gemini API, Stable Diffusion XL

- Engineered an interactive digital canvas web application, seamlessly integrating the Google Gemini API and Stable Diffusion to deliver real-time generative AI features to end-users.
- Designed and built responsive, low-latency frontend interfaces optimized for capturing precise user gestures and instantly rendering high-fidelity AI-generated art.
- Engineered the computer vision pipeline using OpenCV and Google MediaPipe to accurately translate spatial hand gestures into precise digital brushstrokes with minimal input lag.

Crowd Density Estimator (CrowdVision)

Python, Flask, YOLOv8, OpenCV, SQLite, JavaScript

- Engineered a scalable real-time crowd monitoring web application using Flask and PyTorch, seamlessly integrating the YOLOv8 deep learning model to deliver accurate human object detection and spatial analytics.
- Designed and built responsive, low-latency monitoring dashboards optimized for live camera streaming, featuring customizable numerical capacity thresholds and instant browser-based audio-visual alerts.

E-Vaccine Management System: Designed and developed a comprehensive digital platform to streamline vaccination scheduling, record management, and user administration.

- Engineered a secure database architecture (using MySQL/NoSQL) to handle and organize data efficiently for different user roles (e.g., Admins, Patients, Medical Staff).
- Built a responsive frontend interface to ensure a seamless and accessible user experience across devices.

SKILLS

Languages	Python, SQL, JavaScript, PHP, HTML, CSS, React, Node js
Tools/Frameworks	Scikit-Learn, Pandas, NumPy, OpenCV, TensorFlow / Pytorch, Matplotlib, Power BI, AWS, Git
Databases	Relational Databases (SQL), NoSQL
Other Skills	Machine Learning (Supervised & Unsupervised), Deep Learning, Natural Language Processing (NLP), Computer Vision, Data Analysis, Data Structures & Algorithms.

EDUCATION

Master of Computer Applications (MCA)	2024- 2026
KMM COLLEGE OF ARTS AND SCIENCE.	
Bachelor of Computer Applications (BCA)	2020-2023
Jai Bharath Arts & Science College Perumbavoor.	

CERTIFICATES

Luminar Technolab Certificate	May 2024
Completed My Course On Big Data Analytics & Data science
